

NOTE

Cereal Chemistry, Vol. 50, No. 2

A Specific Method for the Determination of Pentosans in Cereals and Cereal Products, J. Cerning and A. Guilbot, pp. 176-184

On p. 177 we indicated the address of Seval, 21, rue des Ecouffes, 75004 - Paris - France (manufacturer of the Duffau distillation apparatus). Lately we have encountered difficulties with that manufacturer; several of the most recently manufactured apparati gave unsatisfactory performances. We have since found another producer whose work has shown to be reliable and precise: Etablissement Bercauverre S.A. (Mr. Berthelin), 3, rue Rollin, 75005 - Paris - France.

J. CERNING
