

# TERMS of USE and FAQs

for Electronic Institutional Subscriptions to

## CEREAL CHEMISTRY

Published by AACC, a nonprofit Scientific Association since 1915.

### TERMS of USE

Electronic Subscriptions to the journals of The American Association of Cereal Chemists (AACC) are available to academic libraries, corporate libraries, and other institutions. Electronic institutional subscriptions include the following benefits:

1. Permission to freely distribute the content of the subscribed electronic journal(s) to all employees, faculty, students, and/or local patrons of the subscribing institution who are located at the site(s) identified by the subscribing institution and whose computers are within the I.P. addresses that are provided to AACC by the institution.
2. Online access to the current subscribed volume and all back issues of the journal that are housed on the AACC web server beginning with the 1997 volume year as long as the institution's electronic subscription is active.
3. Delivery of archival copy of journal via your choice of print or year-end CD-Rom for the year the institution is subscribed to the electronic journal.
4. Freedom from restrictive licenses or signed agreements.

This copyright statement is affixed to all AACC journals. Permission to distribute according to these terms of use applies to current paid electronic subscribers.

#### COPYRIGHT STATEMENT

## FAQs

The questions and answers below have been compiled to further explain AACC's position on its institutional electronic subscriptions.

**Q: How do the employees or students at an institution gain access to *Cereal Chemistry* on a daily basis?**

A: Via I.P. address recognition. AACC requests the institution's I.P. addresses so that your users do not need to login to *Cereal Chemistry*. Access is quick, easy, and seamless for the user.

**Q: What if the institution has more than one campus or location?**

A: AACC asks each institution to identify the campuses and locations served by the I.P. ranges you provide when you subscribe.

**Q: How is the annual subscription price of an institution's online access determined?**

A: AACC uses a number of factors to determine the price of the Society's electronic journals including the size of the institution, the quantity of AACC journals subscribed by the institution, and the number of faculty, students, and/or employees at the institution who are identified as potential users. AACC is a nonprofit society publisher and it is the Association's goal to make the AACC journals widely available online to as many potential users as possible at a reasonable price. The AACC governing Board, which is comprised of scientists from universities and agricultural companies worldwide, wants to maintain the financial integrity of the journal while achieving a broad distribution of the scientific research.

**Q: May employees, faculty, and students gain access to *Cereal Chemistry* when they travel to other locations or from their homes, dorm rooms, etc. by remote personal login to their institution's internal network?**

A: Yes, but only if they work, teach, or attend the institution in the location(s) served by the I.P. ranges where the electronic access is subscribed. Employees at satellite facilities that are not physically on the same campus or site must be identified by the institution at the time the institution subscribes to be included as qualified users, even if the users of the subscribing institution share time at both sites.

**Q: What happens if an institution subsequently drops its electronic subscription?**

A: The institution may still provide access to any volume year for which it purchased a subscription via print or CD-Rom. That's why AACC offers the choice of an archival print subscription or CD-Rom. However, the institution is responsible for providing such ongoing access itself under the same terms described here.

**Q: Are institutional users permitted to make copies of AACC materials for distribution outside the institution's own employees, faculty, students, and/or local library patrons where the journal is subscribed?**

A: No

**Q: What about interlibrary loan?**

A: Subscribing institutions may supply interlibrary loan to the extent that they do normally with a print journal. Rather than supplying electronic files, the loaning institution may only supply printouts.

**Q: Will licenses or signed agreements be required in the future?**

A: AACC reserves the right.

**Q: Why is AACC taking this unprecedented approach of providing electronic access without a signed agreement?**

A: AACC believes scholarly materials should be available within institutions with a little restriction as possible; provided its journals maintain their financial integrity. AACC also believes that authors, readers, institutions, and journals within the scholarly community have a common purpose. Because of this, AACC hopes all members of the community will act appropriately to ensure the ongoing simplicity of this system of access.
