CONTENTS

NUMBER 1, JANUARY, 1963

Some Characteristics of Yolk Solids Affecting Their Performance in Cake Doughnuts. I. Effects of Yolk Type, Level, and Contamination with White. Maura L. Bean, T. F. Sugihara, and Leo Kline ........................................... 10

Production of Fodder Yeast from Barley. I. Preliminary Studies on the Use of the Waldhof Fermentor. K. J. Goering and M. J. Houle .................................. 18

Location and Possible Role of Esterified Phosphorus in Starch Fractions. M. W. Radomski and M. Doreen Smith .......................................................... 31

Some Characteristics of Yolk Solids Affecting Their Performance in Cake Doughnuts. II. Variability in Commercial Yolk Solids. Leo Kline, T. F. Sugihara, and Maura L. Bean ....................................................... 38

The Specific Surface of Flour and Starch Granules in a Hard Winter Wheat Flour and in Its Five Subsieve-Size Fractions. Rezsoe Gracza and Sheldon I. Greenberg ..................................................... 51

A Trypsin Inhibitor in Wheat Flour. E. Mitchell Learmonth and J. C. Wood .... 61

Determination of Chromium and Lead in Periodic Acid Solution and Dialdehyde Starch. L. T. Black, E. B. Lancaster, and H. G. Maister .................................... 66

Measuring the Oil-Binding Characteristics of Flour. W. C. Shuey, O. S. Rask, and P. E. Ramstad .......................................................... 71

Effect of l-Arabinose and d-Xylose on Dough Fermentation and Crust Browning. J. G. Ponte, Jr., S. T. Titcomb, and R. H. Cotton .......................................... 78

Comparative Hydrolysis Rates of the Reducing Disaccharides of d-Glucopyranose. M. L. Wolf from, A. Thompson, and C. E. Timberlake ...................... 82

Communication to the Editor. Modification of the Polarimetric Starch Determination on High-Amylose Corn. R. A. Anderson and D. E. Uhl ...................... 87

Editorial Policy ........................................................................... 88

NUMBER 2, MARCH, 1963

Flour Maturing and Bleaching with Acyclic Acetone Peroxides. C. G. Ferrari, K. Higashiuchi, and J. A. Podil ska .......................................................... 89

Proteins of Wheat and Flour. The Separation and Purification of the Pyrophosphate-Soluble Proteins of Wheat Flour by Chromatography on DEAE-Cellulose. D. H. Simmonds .................................................. 110

The Protein Composition of Different Flours and Its Relationship to Nitrogen Content and Baking Performance. Pamela M. Bell and D. H. Simmonds .... 121

Moisture Contents of Hard Red Winter Wheat as Determined by Meters and by Oven Drying, and Influence of Small Differences in Moisture Content upon Subsequent Deterioration of the Grain in Storage. C. M. Christensen and Pekka Linko ........................................... 129

Flour Lipids and Oxidation of Sulfhydryl Groups in Dough. C. C. Tsen and I. Hlynka ........................................................................... 145
Some Factors Affecting the Tensile Strength of Starch Films. Norman E. Lloyd and Louis C. Kirst .................................................. 154
Isolation, Origin, and Synthesis of a Bread Flavor Constituent. Lazare Wise-blatt and Hani F. Zoumut ..................................... 162
Effect of Processing Conditions on Dry-Heat Expansion of Bulgur Wheat. R. E. Ferrel and J. W. Pence ............................................. 175
Effect of Maltose on Acid Reversion Mixtures from D-Glucose in Relation to the Fine Structures of Amylopectin and Glycogen. M. L. Wolfrom, A. Thompson, and R. H. Moore ........................................... 182
Vacuum-Tempering Corn for Dry-Milling. L. A. Weinecke, O. L. Brekke, and E. L. Griffin, Jr. .................................................. 187
Communication to the Editor. Differential Media for the Isolation of Bacteria and Fungi from Plated Barley Kernels. Evan H. Pepper and Richard L. Kiesling .................................................. 191
Editorial Policy and Suggestions to Authors ...................................... 194

NUMBER 3, MAY, 1963

Hydrophilic Colloids as Additives in White Layer Cakes. William E. Young and E. G. Bayfield .................................................. 195
The Influence of Plant Growth Regulators Applied to Barley during Malting on Properties of Malt. Neville Prentice, Allan D. Dickson, B. A. Burkhart, and N. N. Standridge ................................................ 208
Glutamic-Aspartic Transaminase in the Germinating Barley Embryo. W. C. Burger ........................................................................ 220
Improved Method for Testing Macaroni Products. Adolph Holliger .............. 231
An Examination of Anthocyanogens in Grain Sorghums. C. W. Blessin, C. H. VanEtten, and R. J. Dimler .............................................. 241
Carotenoid, Oil, and Tocopherol Content of Corn Inbreds. F. W. Quackenbush, Jean G. Firch, A. M. Brunson, and L. R. House .................................................. 250
The Effect of Proofing and Baking on Concentrations of Organic Acids, Car­bonyl Compounds, and Alcohols in Bread Doughs Prepared from Pre-Fer­ments. E. W. Cole, W. S. Hale, and J. W. Pence ...................................... 260
Corn Carotenoids: Effects of Temperature and Moisture on Losses during Storage. F. W. Quackenbush .................................................. 266
Preparation of Acid-Modified Flour for Tub Sizing. E. B. Lancaster, L. A. Pope, and E. L. Griffin, Jr. .................................................. 269
Tests of Corn Stored Four Years in a Commercial Bin. R. E. Welty, S. A. Qasem, and C. M. Christensen .............................................. 277
Communication to the Editor: The Bread-Improving Effect of Heptane and Hexane. J. G. Ponte, Jr., S. T. Titcomb, and R. H. Cotton .................................................. 285
Communication to the Editor: A Freezing Technique for Concentrating Pre­Ferments. Walter S. Hale and Earl W. Cole .............................................. 287

NUMBER 4, JULY, 1963

Diffusion of Water in Kernels of Corn and Sorghum. Liang-tseng Fan, Pu-Shan Chu, and John A. Shellenberger .............................................. 303
Determination of Sulfhydryl and Disulfide Groups in Flour and Their Relation to Wheat Quality. C. C. Tsen and J. A. Anderson .................................................. 314
Influence of Maturity on Properties of Western Rices. E. B. Kester, H. C. Lukens, R. E. Ferrel, A. Mohammad, and D. C. Finrock 323
Curtain Electrophoretic Separation of the Water-Soluble Constituents of Bleached Cake Flour. Rudolf G. Strobel and John Holme 351
Chemical Composition of the Water-Soluble Constituents of Bleached Cake Flour. Rudolf G. Strobel and John Holme 361
The Oxidation of Wheat Flour. V. Effect of Lipid Peroxides and Antioxidants. Leland K. Dahle and Betty Sullivan 372
Influence of Small Differences in Moisture Content upon the Invasion of Hard Red Winter Wheat by Aspergillus restrictus and A. repens. Clyde M. Christiansen 385
Fractionation and Zone Electrophoresis of Proteins of Water-Soluble Materials of Flour. C. C. Nimmo, Mary T. O'Sullivan, Ali Mohammad, and J. W. Pence 390
Changes in Sulphydryl and Disulfide Contents of Doughs during Mixing under Various Conditions. C. C. Tsien and W. Bushuk 399
Studies with Radioactive Tracers. VII. Investigations with Flour Containing 35S. C. C. Lee and Kwok-Ming Wan 415
A Farinograph Technique for Studying Gluten. W. Bushuk 430
Carotenoids of Corn and Sorghum. III. Variation in Xanthophylls and Carotenes in Hybrid, Inbred, and Exotic Corn Lines. C. W. Blessin, J. D. Brecher, R. J. Dimler, C. O. Grogan, and C. M. Campbell 436
Starch-Liquefying Properties of Crystalline Alpha-Amylases. Marta S. Moro, Y. Pomeranz, and J. A. Shellenberger 442
Characteristics of the Various Soybean Globulin Components with Respect to Denaturation by Ethanol. Ronald C. Roberts and D. R. Briggs 450
Editorial Policy 459

NUMBER 5, SEPTEMBER, 1963

The Sugars of Germinating Corn (Zea mays). A. B. Bond and R. L. Glass 459
Macro Paper Chromatography of Corn Starch Hydrolysates. J. D. Commerford, G. T. Van Dusee, and B. L. Scallet 482
Effect of Water-Insoluble Pentosan Fraction of Wheat Endosperm on the Quality of White Bread. K. Kulp and W. G. Bechtel 493
The Oxidation of Wheat Flour. IV. Labile and Nonlabile Sulphydryl Groups. Betty Sullivan, Leland K. Dahle, and James H. Schipke 515
A New Powdered Agent for Flour Maturing. Robert R. Joiner, Frederick D. Vidal, and Henry C. Marks ................................................................. 539
A Note on the Rates of Reaction of L-Cysteine Hydrochloride with Certain Maleimides. C. C. Lee and E. R. Samuels ................................................................. 563
Corn Dry-Milling: Effect of Beall Degerminator Tail-Gate Configuration on Product Streams. L. A. Weinecke, O. L. Brekke, and E. L. Griffin, Jr. ................................................................. 575
Carotenoids of Corn and Sorghum. V. Distribution of Xanthophylls and Carotenes in Hand-Dissected and Dry-Milled Fractions of Yellow Dent Corn. C. W. Blessin, J. D. Brecher, and R. J. Dimler ................................................................. 582
Communication to the Editor: Changes in Sulphydryl Groups of Flour during Storage. C. C. Tsen and C. J. Dempster ................................................................. 586
Communication to the Editor: Preparation of Aluminum Lactate. R. W. Jones and J. E. Cluskey ................................................................. 589
Notice Concerning Manuscript Preparation ................................................................. 591
Editorial Policy and Suggestions to Authors ................................................................. 592

Number 6, November, 1963

Determination of Intrinsic Viscosity of Starches. Harry W. Leach ................................................................. 593
Studies of the High-Protein Fines and Coarse Fractions of a Southwest and an Intermountain Flour. J. G. Ponte, Jr., S. T. Titcomb, Jutta Cerning, and R. H. Cotton ................................................................. 601
Conversion of Starch by Microbial Enzymes for Production of Syrups and Sugars. Leo J. Denault and L. A. Underkofler ................................................................. 618
Effect of Artificial Drying on the Hygroscopic Properties of Corn. John Tuite and G. H. Foster ................................................................. 630
The Reaction Mechanism of Azodicarbonamide in Dough. C. C. Tsen ................................................................. 638
L-Ascorbic Acid Oxidizing System in Dough and Dough Improvement. T. Kunitori and H. Matsumoto ................................................................. 647
Effects of Sugars and Certain Free Amino Acids on Bread Characteristics. G. Rubenthaler, Y. Pomeranz, and K. F. Finney ................................................................. 658
The Effect of Tailings of Wheat Flour and Its Subfractions on the Quality of Bread. K. Kulp and W. G. Bechtel ................................................................. 665
Heat of Vaporization for Shelled Corn. Jorge H. Rodriguez-Arias, Carl W. Hall, and Fred W. Bakker-Arkema ................................................................. 676
Permanganate Oxidation of Corn Starch. T. E. Yeates, G. E. Babcock, and C. L. Mehltretter ................................................................. 684
Effects of Thiolated Gelatins and Glutathione on Rheological Properties of Wheat Doughs. Evangelina Villegas, Y. Pomeranz, and J. A. Shellenberger ................................................................. 694
Reactions of Flour Protein Sulphydryl with N-Ethylmaleimide and Iodate. R. Tkachuk and I. Hlynka ................................................................. 704
Editorial Policy and Suggestions to Authors ................................................................. 717
Index to Volume XL ................................................................. 719
