Subject Index

Page number of erratum is in italic.

Acknowledgment of reviewers, v
Additives, effect on bread quality using durum wheat (Boyacioglu and D’Appolonia), 28
Air classification, high-protein and high β-glucan barley (Wu et al), 220
Amaranth —isolation and characterization of starch from (Zhao and Whistler), 392
—starches; comparison of yield and properties of, using wet and dry-wet milling processes (Uryapongsong and Rayas-Duarte), 571
—wet milling and starch quality (Myers and Fox), 96
Amino acid —composition; of oat protein fractions (Lapveteläinen and Aru), 133
—content; in brown and polished rice (Sotelo et al), 605
α-Amylase, activity; correcting Falling Number values from ground wheat meals (Stone et al), 269
Amylopectin —effect of retrogradation on enzyme susceptibility (Eerlingen et al), 351
—maize, molecular size distributions (Politz et al), 532
—retrogradation from maize and wheat (Ward et al), 150
Amylose —content in rice, relation to cooked rice texture (Radhika Reddy et al), 548
—lipid complexed via extrusion cooking (Bhatnagar and Hanna), 587
—location in starch granule (Kasemsuwan and Jane), 282
—maize, molecular size distributions (Politz et al), 532
—rapid estimation in maize starches (Knutson and Grove), 469
Antioxidant, activity of zeins from maize (Matsumura et al), 428
Arabinoxylan, from wheat bran; preparation of (Shiba et al), 279
Ascorbic acid, fortification in bread (Park et al), 412
Bagels, laboratory-scale procedure for producing (Bath and Hoseney), 403
Baked goods, analysis and prediction of dietary fiber content and composition in (Vollandorf and Marlett), 99
Baking —bagels, procedure for producing (Bath and Hoseney), 403
—bread; emulsifier compared to enzymes (Valjakka et al), 139
—bread, use of durum flour or semolina (Boyacioglu and D’Appolonia), 34
—chocolate chip cookies with reduced shortening (Armbritzer and Setser), 344
—comparison of durum and bread wheats (Boyacioglu and D’Appolonia), 21
—effect on dietary fiber content and composition (Vollandorf and Marlett), 99
—effect on microstructural and physical properties of rye dough and bread (Parkkonen et al), 58
—effect using blends of durum and bread wheats (Boyacioglu and D’Appolonia), 28
—of extrusion-formed snacks (Singh et al), 417
—instrumental measurement of bread crumb grain (Sapirstein et al), 383
—white pan bread; sucrose replacement (Valjakka et al), 145
Barley —cereal; properties (Berglund et al), 91
—effects of genotype and nitrogen on protein aggregates (Bénétrix et al), 75
—β-glucan distribution in different genotypes (Miller and Fulcher), 64
—limit dextrinase; bound and free forms (Sissons et al), 520
—extrusion, purification, and characterization (MacGregor et al), 610
—sieved and air classification (Wu et al), 220
—tocols in (Peterson), 42
Beans, effects of minerals and apparent phytase activity in development of (Kilm et al), 476
Bran, corn, steryl ferate and p-coumarate esters (Norton), 111
Bread and baking —ethyl carbamate in U.S. and Canadian breads, measurements by GC-MS (Haddon et al), 207
—pup-loaves and white pan bread, vitamin C stabilities during making and storing (Park et al), 412
—quantitation of crumb grain by digital image analysis (Sapirstein et al), 383
—sponge and dough, oven rise, oxidation (Yamada and Preston), 297
—straight-dough containing varying levels of enzyme-resistant starch (Eerlingen et al), 165
—use of durum flour or semolina to produce bread (Boyacioglu and D’Appolonia), 21, 28, 34
—water-soluble dextrans from α-amylase-treated bread and relationship to bread firming (Akers and Hoseney), 223
—white pan bread, emulsifier compared to enzymes (Valjakka et al), 139
—white pan bread, sucrose replacement (Valjakka et al), 145
Bromate, effects on proteins and lipids of dough (Panozzo et al), 195
Brown rice, lipase activity and oxidation inhibition in (Champagne and Hron), 483
Cakes —functionalinity of wheat lipid fractions in sponge cake-baking (Takeda), 6
—yellow layer, enzyme-resistant starch in (Lin et al), 69
Calcium, absorption in rats fed red or white winter wheat or oatmeal diets (Maziya-Dixon and Klopfeinstein), 544
Cancer, colon, protective effect of red vs. white wheat (Maziya-Dixon et al), 359
Carbohydrates, as fat replacers in chocolate chip cookies (Armbritzer and Setser), 344
Carbon dioxide, supercritical extraction of corn gluten meal (Wu et al), 217
Cereal —extruded, barley (Berglund et al), 91
—starch measurement of, interlaboratory evaluation (McCleary et al), 501
Cholesterol —effect of wheat water solubles compared with oat bran (Maziya-Dixon et al), 287
—lowering effects of hard red vs. hard white wheats and oatmeal (Maziya-Dixon and Klopfeinstein), 539
Cookies —chocolate chip with reduced shortening (Armbritzer and Setser), 344
—sugar-snap quality associated with HMW glutenin alleles (Souza et al), 601
Corn (see also Maize) —drying of high-moisture, effect on physical qualities and protein properties (Pepinski et al), 129
—gluten meal, supercritical carbon dioxide extraction (Wu et al), 217
—immunoassay detection of residues (Hardy and Hurburgh), 107
—masa, effect of cooking time, grinding, and moisture content on (Ramirez-Wong et al), 337
—shear thinning of pasted starches (Subramanian et al), 272
—starches of, free fatty acids in (Kitahara et al), 439
—starch molecular size determination (Politz et al), 532
—thermal properties of tropical and semitropical maize starches (Li et al), 87
Corn meal, extrusion cooking of, with soy fiber, salt, and sugar (Jin et al), 227
Corn starch —amylose-lipid complex formation during single-screw extrusion of (Bhatnagar and Hanna), 582
—extruded, relationship between functional properties and macromolecular modifications of (Tang and Ding), 364
—lipid complexing via extrusion cooking (Bhatnagar and Hanna), 587
—thermal properties (Campbell et al), 556
Danish pastry, effect of ingredients on firming (Sternhagen and Hoseney), 560
Dietary fiber, content and composition in baked products (Vollandorf and Marlett), 99
Differential scanning calorimetry —of corn starch (Campbell et al), 556
—of detecting amylose-lipid complexing (Bhatnagar and Hanna), 587
Dough —corn, fermentation (Obiri-Danso), 186
—effect of low amounts of reducing agents (Khan et al), 242
—frozen, effect of cream or compressed yeast (Gélinas et al), 183
—frozen, effects of storage and thaw-freeze cycles on rheological properties (Inoue et al), 118
—mixing; effect of methoxyhydroquinone on (Koh and Hoseney), 223
—mixing; properties as measure of reversible reduction and oxidation of (Bekes et al), 44
—mixing requirement of Australian cultivar, Dollarbird (Oliver and Allen), 51
—properties of extrusion-formed and baked snacks (Singh et al), 417
—properties; proteins and lipids (Panozzo et al), 195
—rheology and stickiness evaluation (Fenn et al), 189
-stickiness (Heddeson et al), 564
-sugar content (Potus et al), 505
-wheat tortilla, effect of decorticated sorghum addition on rheology of (Torrres et al), 509

Drying
-determination of dry gluten in air oven vs. microwave oven (Vatsala and Haridas Rao), 635
-effect of cowpea addition and high temperature drying on soft wheat pasta quality (Berman et al), 513
-effect of drying conditions on Maillard reaction extent in pasta (Resmini and Pellegrino), 242
-of high-moisture corn; changes in physical quality and protein property (Peplinski et al), 129

Electrophoresis
-acid-PAGE of LMW and HMW subunits of wheat proteins (Morel et al), 238
-capillary, of wheat gliadin and glutenin subunits (Werner et al), 397
-SDS-PAGE of oat protein fractions (Lapveteliiinen and Aro), 133
-SDS-PAGE of unreduced glutenin (Khan et al), 242
-two-dimensional SDS-PAGE of friabilin (Oda), 394

Energy value, of a synthetic fat (caprein) in muffins (Ranhotra et al), 159

Enzymes
-effect of lipids on the resistance to amylolysis of starch gels (Eerlingen et al), 170
-effect of retrogradation of waxy maize starch on enzyme susceptibility (Eerlingen et al), 351
-limit dextrinase, isolation from malted barley (MacGregor et al), 610
-polyphenol oxidases in wheat (Kruger et al), 324
-quality of breads varying in amylolysis resistance (Eerlingen et al), 165
-raw-starch digesting compared to fungal and bacterial and white pan bread emulsifier (Valjakka et al), 139
-raw-starch digesting, replacement of sucrose in white pan bread (Valjakka et al), 145
-sugar influence on resistant starch formation (Eerlingen et al), 472

Ergosterol, content in relation to grain kernel weight (Regnér et al), 55

Erratum, vol. 71, no. 4, p. 378 and 380

Extrusion
-to complex amylose and lipids (Bhatnagar and Hanna), 587
-conditions; influence on extrusion speed, temperature, and pressure in the extruder and on pasta quality (Abecassis et al), 247
-effects on starch structure (Polizzi et al), 532
-formed snacks, baking (Singh et al), 417
-of high-fiber barley cereals (Berglund et al), 91
-quantities; differences in physical properties and microstructure of wheat cultivars (SuTheerawattananonda et al), 627
-single-screw, of corn starches, amylose-lipid complex formation during (Bhatnagar and Hanna), 582

Extrusion cooking
-of corn meal with soy fiber, salt, and sugar (Jin et al), 227

Fermentation
-corn dough (Obiri-Danso), 186
-sugar utilization during, influence of dough-making conditions (Potus et al), 505

Fertilizer, nitrogen, differing in mode and rate of N release (Peltonen and Virtanen), 1

Fiber
-β-glucan, total dietary and soluble (Beglund et al), 91
-Flat bread, wheatless (Toufeili et al), 594

Flour
-determination of damaged starch (Rogers et al), 578
-effect of methoxyhydroquinone on overmixing of flour water (Koh and Hoseney), 311
-gels; phase transitions of (Huang et al), 202
-wheat lipids, functional properties in sponge cake-baking (Takeda), 6

Fluorescence, intrinsic, quenching of, in gluten proteins (Stevenson and Preston), 155

Fractionation
-of flour protein by solubility and electrophoretic procedures (Khan et al), 242
-of gluten proteins by adsorption chromatography on controlled-pore glass beads (Peruffo et al), 122
-of wheat proteins by RP-HPLC (Huebner), 513
-Functionality, of high-protein oat flour derived from starch process (Lapveteliiinen and Aro), 133

GC-MS, for measuring ethyl carbamate in U.S. and Canadian breads (Haddon et al), 207

Gliadin
-extraction with 70% ethanol and/or 2M LiCl (Huebner), 513
-separation on controlled-pore glass beads (Peruffo et al), 122
-β-Glucan
-distribution in oats and barley (Miller and Fulcher), 64
-enrichment by sieving and air classification (Wu et al), 220
-in oats, structure (Wood et al), 301

Gluten
-gel-filtration fractions, intrinsic fluorescence and quenching studies of (Stevenson and Preston), 155
-rapid determination of by microwave (Vatsala and Haridas Rao), 635
-structure (Bekes et al), 44

Glutenin
-fractionation by SDS-PAGE (Khan et al), 242
-HMW association with sugar-snap cookie quality (Souza et al), 601
-LMW and HMW subunits, characterization by acid-PAGE (Morel et al), 238
-LMW subunits from wheat, simple and rapid method for purifying (Melas et al), 234
-macropolymer; extractability factors (Wegels et al), 308
-polymer purification in nondenaturing conditions (Peruffo et al), 122

Grain
-cereal, adsorption of volatile fungal metabolites to (Börjesson et al), 16
-kernel weight in relation to ergosterol content (Regnér et al), 55

Herbicide, detection in corn (Hardy and Hurburgh), 107

HPLC
-analysis of corn bran sterol esters (Norton), 111
-analysis of Maillard reaction compounds in dried pasta (Resmini and Pellegrino), 254
-of oligosaccharides released by enzyme from β-glucan (Wood et al), 301

Image analysis, of starch granules; to distinguish hard and soft red winter wheats (Zayas et al), 82

Immunoassay, residue detection in corn (Hardy and Hurburgh), 107

Instructions to authors, iii

Legumes, cowpea addition to high-temperature-dried soft wheat pasta (Bergman et al), 523

Lentil, moisture-absorption characteristics of (Tang et al), 423

Limit dextrinase
-from malted barley; extraction purification, and characterization (MacGregor et al), 610
-starch degrading enzyme (Sissons et al), 520

Lipase, oat, effect of variety and growth conditions (Parmar et al), 537

Lipids
-complexing with amylose via extrusion cooking (Bhatnagar and Hanna), 587
-ferulate and p-coumarate sterol esters (Norton), 111
-protein association, bromate effect (Pannozzo et al), 195
-total, contents of free, bound, and structural in small millets (Sridhar and Lakshminarayana), 355
-wheat, functionality in sponge cake-baking (Takeda), 6

Maillard reaction, evaluation in dried pasta by HPLC (Resmini and Pellegrino), 254

Maize (see also Corn)
-antioxidant activities of zeins from (Matsumura et al), 428
-rapid estimation of amylose in starches (Knutson and Grove), 469
-starch; structure and function with different sugary-2 dosages (Campbell et al), 464; thermal properties (Campbell et al), 556

Malt, limit dextrinase; extraction, purification, and characterization (MacGregor et al), 610

Malting, effects on tocols (Peterson), 42

Mashing, effects on barley tocols (Peterson), 42

Methods
-correction equation development for Falling Number values from ground wheat meals (Stone et al), 269
-digital image analysis for quantitation of bread crumb grain (Sapirstein et al), 383
-starch damage determination (Rogers et al), 578

Microscopy, fluorescence, in structural studies of rye kernel, dough, and bread (Parkkonen et al), 58

Microwave, rapid dry gluten determination (Vatsala and Haridas Rao), 635

Millet, small, contents of total lipids, lipid classes, and composition of fatty acids in (Sridhar and Lakshminarayana), 355

Milling
-and baking quality of wheat-rye translocations (Fenn et al), 189
-degrees of, measured with commercial milling meter (Siebenmorgen and
---effect of extraction rate on Cantonese noodle quality (Kruger et al.), 317
---effects of frost damage and immaturity on durum wheat semolina, yield and quality (Dexter et al.), 494
---preprocessing effects on (Dexter et al.), 10
---roller and hammer milled wheats, effect on damaged starch measurement (Rogers et al.), 578
---flocols in barley fractions (Peterson), 42

Minerals, effects on hard-to-cook beans (Kilmer et al.), 476

Mixing
---of dough; effect of methoxyhydroquinone on (Koh and Hoseney), 311
---requirement of Australian cultivar, Dollarbird (Oliver and Allen), 51

Mixograph
---dough mixing (Hazelton and Walker), 632
---effect of cell-wall hydrolysatse (Shiba et al.), 279

Moisture, absorption characteristics of lentils and seeds (Tang et al.), 423

Muffins, energy value of medium-chain triglycerides in (Ranhotra et al.), 553

NIR spectroscopy; for rice amylose analysis (Villaereal et al.), 292

Nitrogen, nutrition; effect on protein aggregates in barley (Bénétrix et al.), 75

NMR spectroscopy; of phosphorus in starch (Lim et al.), 488

Noodles
---darkening caused by the enzyme polyphenol oxidase (Kruger et al.), 324
---effect of color and texture (Kruger et al.), 177
---instrumental probe and method to measure stickiness of (Gu and Seib), 330

Oat
---β-glucan distribution in different genotypes (Miller and Fulcher), 64
---β-glucan structure (Wood et al.), 301
---lipase, effect of variety and growth conditions (Parmar et al.), 537
---protein composition and functionality of protein-rich by-product from starch process (Lapvetelainen and Aro), 133
---starch; functional properties and relation to structural characteristics (Wang and White), 443
---starch; structure and physicochemical properties (Wang and White), 443
---texture profile analysis, role and contribution of starch and protein contents and quality (Baik et al.), 315

Oxidation, of doughs (Bekes et al.), 44

Pasta
---effect of cowpea addition and high-temperature drying on soft wheat pasta quality (Bergman et al.), 523
---effects of extrusion conditions on quality (Abecassis et al.), 247
---effects of frost damage and immaturity on durum wheat pasta quality (Dexter et al.), 494
---high-temperature drying and Maillard reaction extent (Resmini and Pellegrino), 254

Pentosans, wheat bran, preparation and effect on mixing properties (Shiba et al.), 279

Popcorn
---kernel moisture content, equilibrium isotherm (Song and Eckhoff), 461
---optimum moisture content of different kernel sizes (Song and Eckhoff), 458

Pressure-sensitive adhesive, properties (Heddleson et al.), 564

Protein
---aggregates in barley (Bénétrix et al.), 75
---effect of extrusion on sorghum digestibility and solubility (Hamaker et al.), 515
---effects of frost damage and immaturity on durum wheat gluten proteins (Dexter et al.), 494
---enrichment by sieving and air classification (Wu et al.), 220
---as fat replacers in chocolate chip cookies (Armbirster and Setter), 344
---frabilin starch granule (Oda), 394
---of oats; alterations occurring in the composition during processing (Lapvetelainen and Aro), 133
---quality changes in dried high-moisture corn (Peplnski et al.), 129
---quality evaluation of cooked rice, in growing rats (Eggum et al.), 199
---quality; Mexican rice varieties (Sotelo et al.), 605
---rice bran, antigenic properties of fractions (Landers and Hamaker), 409
---role in texture profile analysis of Oriental noodles (Baik et al.), 315
---separation of gliadin and glutenin subunits by capillary electrophoresis (Werner et al.), 397
---wheat, determination by dye binding in flour, dough, and bread crumb (Eynard et al.), 434
---wheat storage, quantity and quality of (Peltonen and Virtanen), 1

Response surface methodology, in formulation of wheatless pocket bread (Toufeili et al.), 594

Retrogradation
---of amylopectin from maize and wheat (Ward et al.), 150
---in Danish pastry (Sternhagen and Hoseney), 560

Rheology
---comparison of durum and bread wheats (Boyacioglu and D’Appolonia), 21
---dough mixing (Hazelton and Walker), 632
---measurements on rye doughs (Parkkonen et al.), 58
---rice pastes, viscoelastic properties of (Radhika Reddy et al.), 548
---of wheat tortilla dough, effect of decorticated sorghum addition (Torres et al.), 509

Rice
---amylose analysis by NIR transmittance spectroscopy (Villaereal et al.), 292
---cooked, protein quality of, in growing rats (Eggum et al.), 199
---cooked paste rheology, viscoelastic properties, amylose content and cooking quality (Radhika Reddy et al.), 548
---12 Mexican rice varieties (Sotelo et al.), 605
---milling; process of removing hulls and bran from (Siebenmorgen and Sun), 327
---starch; phase transitions of (Huang et al.), 202

Rice bran
---antigenic properties (Landers and Hamaker), 409
---esterase activity and free fatty acid accumulation in (Tsuuzuki et al.), 162
---RP-HPLC, comparison of 70% ethanol and/or 2M LiCl extracts of wheat flour (Huebner), 513

Rye, microstructure of rye kernel, dough, and bread (Parkkonen et al.), 58

SDS-PAGE, electrophoresis and laser-scanning densitometry for quantifying proteins of wheat (Peltonen and Virtanen), 1

Sonication, of wheat starch (Seguchi et al.), 636

Sorghum
---effect of extrusion on protein digestibility and solubility (Hamaker et al.), 515
---factors affecting color and appearance of starch isolated from (Subramanian et al.), 275
---shear thinning of past starches (Subramanian et al.), 272

Spaghetti
---instrumental probe and method to measure stickiness of (Gu and Seib), 330
---preprocessing effects on (Dexter et al.), 10

Staling
---in Danish pastry (Sternhagen and Hoseney), 560
---importance of durum wheat on bread staling (Boyacioglu and D’Appolonia), 34
---relationship of water-soluble dextrins from α-amylase-treated bread to bread firming (Akers and Hoseney), 223

Starch
---amaranth; comparison of yield and properties of, using wet and dry-wet milling processes (Uriyapongs and Rayas-Duarte), 571; wet milling quality and yield (Myers and Fox), 96
---from amaranth flour, isolation and characterization (Zhao and Whisler), 392
---analysis of amylose’s location (Kasemsuwan and Jane), 282
---cold-water soluble, physical modification (Chen and Jane), 618
---damage, measurement (Rogers et al.), 578
---effect of lipids on resistant starch formation (Eerlingen et al.), 170
---effect of retrogradation of waxy maize starch on enzyme susceptibility (Eerlingen et al.), 351
---enzyme-resistant, in yellow cake mix (Lin et al.), 69
---fatty acids in, of corn and sweetpotato (Kitahara et al.), 439
---granular cold-water soluble, prepared by alcoholic-alkaline treatments (Chen and Jane), 623
---granules; image analysis to distinguish hard and soft red winter wheats (Zayas et al.), 82
---isolated from sorghum, factors affecting color and appearance (Subramanian et al.), 275
---measurement; interlaboratory evaluation (McCleary et al.), 501
---oat, functional properties of (Wang and White), 443
---oat, proteins of (Wang and White), 443
---oat, structure and properties of amylose, amylopectin, and intermediate materials of (Wang and White), 263
---phosphorus in, NMR spectroscopy (Lim et al.), 488
---quality of bread containing varying levels of enzyme-resistant (Eerlingen et al.), 165
---rapid estimation of amylose in maize (Knutson and Groves), 469
---retrogradation: of amylopectin from maize and wheat (Ward et al.), 150; correlation with glass transition temperature (Wang and Jane), 527
---rice, phase transitions of (Huang et al.), 202
—role in texture profile analysis of Oriental noodles (Baik et al), 315
—shear thinning of pasted corn and sorghum starches (Subramanian et al), 272
—sugar influence on resistant starch formation (Eerlingen et al), 472
—thermal properties of tropical and semitropical maize starches (Li et al), 87
—wheat, structures (Seguchi et al), 636
Sugar, influence on enzyme-resistant starch formation (Eerlingen et al), 472
Sugar-2 locus, dosage effect on maize starch (Campbell et al), 464
Synthetic fat, energy value of caprenin (Ranhotra et al), 159

Temperature
—effects of during grain-filling on starches from six wheat cultivars (Shi et al), 369
—glass-transition, correlation with starch retrogradation (Wang and Jane), 527

Texture
—of cooked rice, relation to amylose content, amylopectin structure (Radhika Reddy et al), 548
—corn masa, effect of cooking time, grinding, and moisture content on (Ramirez-Wong et al), 377
Tortilla, wheat dough, effect of decorticated sorghum addition on rheology of (Torres et al), 509
Triglycerides, medium-chain, energy value in muffins (Ranhotra et al), 553
Tryptophan, fluorescence studies of, in wheat gluten extracts (Stevenson and Preston), 155

Urethane, in U.S. and Canadian breads; measurements by GC-MS (Haddon et al), 207
Viscoelasticity, of rice flour pastes, relation to amylose content, amylopectin structure (Radhika Reddy et al), 548
Volatiles, adsorption of, to wheat grains and subsequent desorption (Börjesson et al), 16
Wet milling, amaranth; starch quality and yield fractions (Myers and Fox), 96
Wheat
—breadmaking quality (Yamada and Preston), 297
—cholesterol-lowering effects of red vs. white wheat flours, brans, and whole meals compared to oatmeal (Maziya-Dixon and Klopfenstein), 539
—classification distinguished by image analysis (Zayas et al), 82
durum, preprocessing effects on milling (Dexter et al), 10
durum, use in bread (Boyacigil and D’Appolonia), 21, 28, 34
effect of flour refinement on noodle quality (Kruger et al), 177
effects of red vs. white wheat flours, brans, and whole meals compared to oatmeal on fecal water-holding capacity and loss of protein, ash, calcium, and zinc in rats (Maziya-Dixon and Klopfenstein), 544
—flour quality of amphiploids derived from (Alvarex et al), 517
—fridiinin starch granule protein (Oda), 394
—grains, adsorption of volatile fungal metabolites to (Börjesson et al), 16
—LMW subunits of glutenin, simple and rapid method for purifying (Melas et al), 234
—meals; correcting Falling Number values (Stone et al), 269
—polyphenol oxidases (Kruger et al), 324
—protective effect of hard red vs. hard white in chemically induced colon cancer in mice (Maziya-Dixon et al), 359
—protein determination by dye binding in flour, dough, and bread crumb (Eynard et al), 434
—proteins extracted with 70% ethanol and/or 2M LiCl (Huebner), 513
—proteins; structure of, as examined by fluorescence studies (Stevenson and Preston), 155
—quality of wheat-rye translocations (Fenn et al), 189
—starch, effects of temperature during grain-filling (Shi et al), 279
—starch structures; sonication of (Seguchi et al), 636
—varieties; differences in physical properties and microstructure of (Sutheerawattananonnda et al), 627
—water solubles, in angel food cakes (Maziya-Dixon et al), 287
Wheat bran
—nutritional profile (Ranhotra et al), 321
—purification and characterization of cell-wall hydrolysate (Shiiba et al), 279

Yeast, activity in frozen doughs, effect of cream or compressed (Gélinas et al), 183
Zein, antioxidant activities of, from maize (Matsumura et al), 428
Zinc, absorption in rats fed red or white winter wheat or oatmeal diets (Maziya-Dixon and Klopfenstein), 544
